STORAGE

FLEXIBILITY IN DESIGN AND CONSTRUCTION

Made for any capacity and transportable anywhere

- Stainless steel or aluminium silos
- Automated transport operations
- Solutions suitable for potentially explosive areas

Storing raw materials while maximising safety levels and minimising the risk of contamination is crucial in all food processes.

PiovanGroup designs and manufactures **silos in stainless steel or aluminium alloy** for the **storage of powder or liquid materials**, such as **flour, sugar, glucose and chocolate**. The Group produces ATEX certified monolithic silos.

The silos ensure automated conveying operations and can be equipped with **level sensors, load cells** and special **filtration systems**.

Compared to silos, practical **big-bag solutions** are suitable for **smaller storage volumes**.

In fact, the Group also designs and manufactures fully customised, automated big-bag solutions in controlled atmosphere environments. They still guarantee hermetic closure and offer automatic emptying and tensioning systems.

Big-Bag Station

UNLOADING STATION

Maximum customisation

- Dust-free
- Automatic cleaning filter
- Safety devices for the operator

PiovanGroup manufactures both **stations for unloading bags and big-bags** separately and integrated solutions able to manage both.

The PiovanGroup bag and big-bag unloading station are equipped with a **hoist** and a bag **shaking system**. Through tensioning and shaking the big-bags are always emptied correctly and in the required time, even in the case of products that are difficult to handle.

The Group's bag and big-bag unloading stations are equipped with electronic locks to ensure **maximum safety** for line operators and **high hygiene standards** and **to avoid contamination between different materials**. These units are also designed to ensure **quick maintenance operations**.

Silos

STORAGE SOLUTION FOR INGREDIENTS IN POWDER AND LIQUID FORM

Up to 500 tons

- Tailor made solutions for different applications and materials
- Fully integrated storage solutions and material loading and distribution system
- Turn-key solutions including delivery and installation

Large diameter silos offer with great attention to functional and aesthetics for out door installation.

Suitable for granules, flakes or powders, Piovan silos have specific geometries and devices for according to the materials to store, such as:

- Outlet air filters
- Extraction systems for high friction polymers
- Measurement solutions like load cells or continuous level sensor (radar or plumb bob type)
- Protection systems for potentially explosive atmospheres.

The silos are compatible with a wide range of loading methods like truck pumps, sea containers with bags, high pressure blowers for dense or semidense phase conveying systems.

On request, ground load calculation or specific technical documentation is available.
